Poster # Title: Presenters:

Poster Rubric	**Excellent**	**Good**	**Sufficient**	**Insufficient**
Introduction/ Motivation/ Context	The poster & pitch clearly introduce the main research question and the motivation for studying this question with reference to its position in the research field (including references) +2	The poster & pitch clearly introduce the main research question, includes references, but the motivation could have been clearer. +1½	The main research question and the motivation for studying this question are there implicitly, but could have been presented much more clearly. +1	There is a poster. +½
Research project	The poster & pitch reflect a small but interesting and innovative research project, with methods that fit the research question, a correct implementation of the methods/model, and appropriate experimental results that inform us about the research question. +3	The poster & pitch reflect a small but interesting and innovative research project, with (mostly) methods that fit the research question, a correct implementation, and appropriate experimental results that inform us about the research question. +2½	The poster & pitch reflect a small research project, with methods that fit the research question, but the implementation, and/or results have shortcomings that seriously limit its relevance for the research question. +2	There is a research project. +1
Discussion/ Caveats	The poster explains the relevance of the findings, but also seriously reflects on caveats & limitations (i.e. without overstating the relevance, but also without gratuitious limitations). +2	The poster explains the relevance of the findings for the research field, but could reflect more seriously on caveats & limitations (i.e. some overstating or the mentioned limitations are generic). +1½	The poster fails to clearly explain the relevance of the findings, but does seriously reflect on caveats & limitations +1	There is a poster. +½
Difficulty	The methods used in this project are judged to be of very high difficulty, and yet are mastered correctly. +2	The methods used in this project are judged to be of moderate to high difficulty, and are mastered correctly, or are of very high difficulty but have been applied with some minor errors that don't affect the interpretation. +1½	The methods used in this project are judged to be of low to moderate difficulty, and are mastered correctly; or are of high to very high difficulty, but have been applied with some errors that do affect the interpretation. +1	The methods used in this project are judged to be of low to moderate difficulty, and have been applied with errors that do affect the interpretation. +½
Visuals & information density	The poster is prepared professionally and enhances the oral pitch. The information provided outlines the research at a high level and unnecessary details are left out, while main points stand out. +1	The poster is prepared professionally and its main points stand out. But the match with the oral pitch could be improved and/or more unnecessary details could be left out. +¾	The poster could be prepared more professionally; its main points stand out, but the match with the pitch could be improved and/or more unnecessary details could have been left out. +½	There is a poster. +¼
